EDUCATION

Indian Institute of Information Technology, Sri City 2023–2027
B.Tech in Electronics and Communication Engineering (ECE); CGPA: 8.5 Sri City, AP

EXPERIENCE

Onlearn.app Jan 2026 – Present
Software Developer Intern Remote

- Built and maintained core features for a full-stack LMS; contributed to measurable growth in daily active users.
- Identified and rewrote slow database queries and REST APIs, noticeably reducing page load times across the platform.
- Set up a real-time WebSocket notification system that improved daily engagement by around **15%**.

Qbtrix Innovations Jul 2024 – Aug 2024
SDE Intern Remote

- Developed **Interacly**, a platform that uses LLMs to handle and automate customer support workflows.
- Refactored the Node.js backend for better resource utilisation, bringing monthly server costs down by **~30%**.
- Added Redis caching to high-traffic endpoints, shaving **200ms+** off data load times for common requests.

PROJECTS

Cowscue Feb 2026
Next.js, TypeScript, MongoDB, Gemini AI, Twilio, OSRM [Live Demo](#)

- A real-time animal rescue platform connecting citizens with NGOs — uses Pusher for live WebSocket updates and Clerk for role-based access control.
- Built an AI triage system with Gemini 2.5 Flash that filters spam reports, estimates injury severity, and responds in multiple regional languages.
- Implemented heatmap analytics and batch route optimisation via OSRM to surface accident hotspots and suggest fuel-efficient rescue paths.
- Integrated Twilio to push WhatsApp dispatch alerts with Google Maps coordinates to NGO rescue drivers.

Mailflow Jan 2026
Node.js, TypeScript, Redis [Live Demo](#)

- Built a bulk email dispatch tool backed by Redis (BullMQ) queues, so high-volume sends don't block the server.
- Resolved cloud connection timeouts by configuring SMTP pooling and automatic retries, consistently hitting a **99.9%** delivery rate.
- Added pixel-based open-rate tracking to give campaigns measurable reach data.

Dead Man's Switch Nov 2025
Node.js, Cron, Crypto [Live Demo](#)

- A digital legacy tool where messages are AES-256 encrypted client-side before leaving the browser.
- Implemented a Node-cron background monitor that reliably triggers sends when the user goes inactive, held up through extended stress tests without dropping a job.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, Kotlin, MATLAB
Frameworks: Next.js, React.js, Node.js, Express, Shadcn, FastAPI, Flask, Zustand, Redux
Cloud & DB: AWS, GCP, Docker, PostgreSQL, MongoDB, Redis, Supabase
Engineering: Microservices, Queue Management (BullMQ), RAG Pipelines, Zero-Knowledge Architecture
Tools: Git/GitHub, Postman, Playwright, Vercel, Render, Figma

ACHIEVEMENTS

Reliance Foundation UG Scholar — selected from 58,000+ applicants across India. 2023

LeetCode — peak rating of **1800**; solved **450+** problems across data structures and algorithms.

Placement Coordinator, Training & Placement Cell, IIIT Sri City. Present

Lead Coordinator, Web3SSH '25 — national-level bootcamp & hackathon. Apr–Aug 2025

Sponsorship Lead, Abhisarga Annual Fest. Dec 2025
